Professional Summary

Final-year B Tech student with hands-on experience in AI Engineering, LLM applications, prompt engineering, and workflow automation. Experienced in building AI-powered applications using Python, REST APIs, and automated pipelines. Strong foundation in software engineering, backend development, and AI-assisted system design with exposure to production-grade LLM workflows.

Experience

- LLM Intern, Ethara AI**01/2026 – 05/2026
Gurgaon, Haryana
 - Built and optimized LLM-powered workflows for production use cases using prompt engineering and automated validation pipelines in Python.
 - Worked with AI automation systems, API-driven integrations, and structured evaluation frameworks to improve response quality and reliability.
- Telecom Intern, Power Grid Corporation of India**06/2025 – 07/2025
Lucknow, Uttar Pradesh
 - Assisted in monitoring and troubleshooting communication networks and optical fiber systems.
 - Analyzed network routing and communication protocols to support operational reliability.

Projects

- AI Support Agent (LLM-Powered Ticket Routing System), Python, NLP, Modular Pipelines**
 - Built an LLM-powered support agent for automated ticket classification, routing, and escalation using modular AI workflows and NLP pipelines.
 - Wrote unit tests and performed end-to-end debugging using AI coding tools (Copilot/Claude) ensuring comprehensive coverage.
- Facial Recognition & Attendance System, Python, Flask, dlib, Face Recognition, NumPy**
 - Developed a real-time facial recognition system for automated attendance, integrating data ingestion, embedding generation, and live inference.
 - Conducted systematic testing to identify and mitigate false positives caused by environmental variables like lighting, pose variation, and sensor noise.

Technical Skills

- Programming & Data**
Python, C/C++, Java, SQL
- Machine Learning**
Machine Learning, Feature Engineering, Model Training, Model Evaluation
- AI Engineering**
Python, Prompt Engineering, LLM Applications, OpenAI APIs, AI Agents, Workflow Automation, RAG Fundamentals, Vector Databases (FAISS), LangChain, AI Evaluation
- Software Engineering**
Git, GitHub, DSA, OOP, REST APIs, Backend Development, Unit Testing, Agile SDLC

Education

- B.TECH in Electronics and Communication, University Of Lucknow**10/2023 – Present
Lucknow, Uttar Pradesh
- Current GPA: 8.35
